

AMENDMENTS TO THE CLAIMS

List of Claims:

Claim 1 (Cancelled)

2. (Amended) The polyester-based heat-shrinkable tube for covering a condenser as claimed in ~~claim 1~~ claim 7, wherein the external particle comprises talc or silica.

Claim 3 and 4 (Cancelled)

5. (Currently Amended) The polyester-based heat-shrinkable tube for covering a condenser as claimed in ~~claim 1~~, claim 7, wherein the polyester resin or the copolyester resin comprises a mixed resin comprising: 80 to 99 weight percent of a copolymer resin comprising 1 to 15 mol % of polyethylenenaphthalate and 85 to 99 mol % of polyethyleneterephthalate and having an intrinsic viscosity of 0.65 to 1.0 dl/g; 1 to 20 of a resin comprising polybutyleneterephthalate melted with a pigment; and 0.01 to 1.0 weight percent of a metal salt of benzoic acid or stearic acid.

Claim 6 (Cancelled)

7. (New) A polyester-based heat shrinkable tube for covering a condenser comprising a polyester or copolyester resin as a principal component and external particles,

said polyester or copolyester resin containing a mixture of 80-99 weight percent of copolymer resin which includes 1-15 mol% of polyethylene naphthalate and 85-99 mol% of polyethylene terephthalate which has an intrinsic viscosity of 0.65 to 1.0dl/g and 1-20 weight percent of polybutylene terephthalate resin containing 10-30 weight percent of a pigment,

said external particles being present in an amount of 0.01 to 3.0 weight percent and having an average particle diameter of 0.5 to 3.5 μm , and

said polyester-based heat shrinkable tube having a slipperiness in the range of 300 to 800g/f.

8. (New) A polyester-based heat shrinkable tube for covering a condenser comprising a copolyester resin as a principal component and external particles,

said copolyester resin comprising a mixture of 80-99 weight percent of a copolymer resin which includes 1-15 mol% of polyethylene naphthalate and 85-99 mol% of polyethylene terephthalate, which has an intrinsic viscosity of 0.65 to 1.0dl/g, and 1-20 weight percent of polybutylene terephthalate resin containing 10-30 weight percent of a pigment,

said external particles being present in an amount of 0.01-3 weight percent and having an average particle diameter of 0.5-3.5 μm ; and

said polyester-based heat shrinkable tube having a slipperiness in the range of 300-800g/f.
